Magnetic Switches (Extra 4pcs)

MAGNETIC SWITCH REPLACEMENT

Universal & Customizable

Full-key hot-swappable design lets you swap popular switches.

Note:

This keyboard supports hot-swapping with most magnetic switches on the market. Due to differing manufacturing standards, the third-party switches may have variant magnetic conduction parameters.

The same precision adjustment increments as our original switches are not guaranteed.

BLOODY MS MAGNETIC HALL-EFFECT SWITCH

Unleash Analog Input & Full-Stroke Motion Precision

Each key transmits high-fidelity analog signals, enabling versatile functionality that enhances typing efficiency and elevates gaming performance.

Durability: 100 Million Keystrokes

Initial Force: 25 ± 5 cN Min

Tactile Force: 48 ± 5 cN

Total Travel Distance: 3.5 ± 0.1 mm

Rapid Trigger Range: 0.1 mm ~ 2.2 mm

Actuation Point Range: 0.1 mm ~ 3.5 mm

THE POWER OF ANALOG

Hall-Effect Switch Precision

Actuation Point

Precision-Tuned Sensitivity Control

Adjust your actuation point from 0.1mm to 3.5mm.

Fine-tune each key in 0.02mm increments to match your unique gaming style.

Precision: 0.02 mm

Rapid Trigger

Instant Response on Key Release

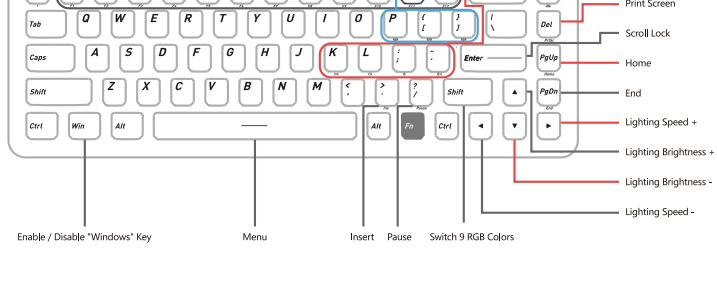

Featuring 0.02mm precision sensing, keys reset instantly the moment you lift your finger.

Adjust trigger travel between 0.1mm and 2.2mm to match your specific playstyle.

Precision: 0.02 mm

KNOW YOUR PRODUCT

BLOODY UNIFIED SOFTWARE

Master Your Input Experience

Fine-tune every detail of your input setup—from actuation points and stroke depth to RGB lighting effects and macro combinations. Take full command of your performance via our unified software, available in two access options.

① Download Version: www.bloody.com/en/download.php

Supports Windows 10 and later versions.

② Web-Based Version: hub.bloody.com

Compatible with all Chromium-based browsers on Windows, Mac, and Linux operating systems. Examples: Chrome, Edge

You can also access the web-based version directly via the FN+👁 keyboard shortcut.

NOTE

① This product is equipped with Hall sensors, magnetic sensing components, etc. Please keep it away from magnetic objects during use to ensure stable operation.

② This product should not be used with extension cable or HUB, otherwise, the trigger stroke of the magnetic axis and RGB lighting will become very unstable.

ADVANCED KEY CUSTOMIZATION

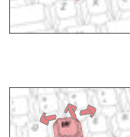

Tailor Your Keyboard to Perfection

Unlock 5 pro-grade advanced key features to customize control exactly to your playstyle and workflow.

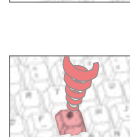

Dynamic Keystroke

Dynamic Keystroke lets a single key handle 1–4 functions, each triggered by different levels of key press.

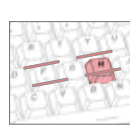

Mod Tap

Mod Tap enables a single key to have two functions—hold it for one action and click it for another.

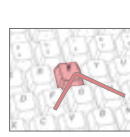

Toggle Key

Toggle Key lets you click a key to toggle continuous trigger on or off, while holding it performs a normal trigger.

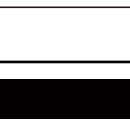

Rappy Snappy

Rappy Snappy uses two keys, triggering the one pressed deeper first, and when the stroke is the same, they will be triggered simultaneously.

Simultaneous Opposing Cardinal Directions

SOCDD intelligently handles opposing-direction inputs (e.g., pressing left and right keys together, determining which input triggers).

CUSTOMIZABLE RGB

Unleash Your RGB

Driver-Free Switches + Software Customization

① Driver-Free RGB Effects

Switch via "👁" or "Fn+Shift"

② Lighting Effects & RGB Colors

Customizable in the Software via "Fn+Backspace"

Function Compatibility

Compatible with most audio-enabled media tools (PC/Online).

Open Bloody software and your desired media software simultaneously to sync audio with rhythmic lighting effects.

Reminder

Rhythmic Lighting Effects:

Only compatible with the Download Version software.
